Creating and pricing a custom folder is as simple as making a model number. Follow these four easy steps and refer to model number created below:

1. Select a container, either folder or pocket. Use the 6-digit model number as the first 6-digits of your custom folder model number. Example: 11 Pt. Manila folder with a double end tab is model number 1103-50.
2. Select the components you want to add to the folder in the order listed in the Component Table above. This could include fasteners, pockets, dividers, printing, and labels. Add the component model letter onto the end of your 6-digit model number chosen above. Example: 1103-50 with a 2" bonded fastener is 1103-50B.
3. Specify where you want the component located by the position numbers shown. Example: You choose positions 1 and 3 for the 2" bonded fastener. Your model number becomes 1103-50B13.

Printing Positions	Location
Position 1	Outside Front
Position 2	Inside Front
Position 3	Inside Back
Position 4	Outside Back

4. Repeat steps 2 and 3 for each additional component on the custom folder. Add components in ascending alphabetical order so fasteners always occur in the model number before pockets, etc.
