

DATAFILE™ CABINETS

DataFile™ cabinets' fixed shelf design can save you time and money by improving the utilization of your storage space, without sacrificing accessibility. They are the ideal solution to address accessibility, security and space issues. Datafile cabinets are available in two shelf height configurations, come in two to seven compartments high and in an array of contemporary colours.

Better management of your space

DataFile cabinets are designed to maximize filing capacity, often eliminating the need for multiple cabinets. Their convenient lateral fixed shelf design replaces vertical rollout drawers, reducing the aisle space required.

Access & secure information easily

With DataFile cabinets you identify your folders on the side to speed up filing and retrieval times. The fixed shelf design eliminates the risk of tipping associated with rolling drawer cabinets. When coupled with doors and gang locks, your information is securely stored.

Organize for efficiency

DataFile cabinets can accommodate letter/legal size folders. They are also available with extra large multi-media size shelves. You can store files, binders and other media in one area, reducing filing and retrieval times.

Benefits

Reduced storage space

(up to 69% less than traditional roll-out drawer filing cabinets)

Maximized efficiency of your filing areas

(all media stored in same cabinets)

Controlled access to your most important files

(with doors and ganglocks)

Reduced long-term cost of storage

(with a lifetime warranty)

TAB STORAGE SYSTEMS
