

TAB

# ANNOUNCEMENT

June 23, 2008 - TAB Products Company LLC is proud to announce the approval of a new AIA/CES program entitled "***Green Design Strategies with Today's Storage Solutions***".

The AIA/CES (American Institute of Architects Continuing Education Systems) program is a network of providers who offer quality continuing education to its members, and other design professionals worldwide. Our new presentation is 1 hour in length, and is equivalent to 1 learning unit (LU).

After completion of this new course, participants will be able to understand how high-density mobile storage can have a direct impact on our natural environment, economy, health, materials and resources that are used, reduced building sizes for sustainable sites, and reduced energy consumption.

TAB is a registered provider of AIA/CES seminars and learning units may be earned by attending our educational sessions. TAB offers comprehensive study on storage solutions in today's workplace, which can impact the design vision.

For more information on how TAB can add value to your architectural or design practice, or if you would like more information in earning AIA/CES continuing education credits by attending one of our educational seminars, please refer to our website at <http://www.tab.com/Industry/IndustryArch.aspx>.
